

**ROQ IS PROUD TO LAUNCH A NEW PRODUCT: ROQADHESIVE ALLOVER. THE FUNCTION OF THIS PRODUCT IS TO GLUE THE INSIDE OF A T-SHIRT TO ALLOW THE "ALLOVER" PRINT.**

Our engineers dwelled into the specifics of this sensitive work and came up with a new design in the ALLOVER **keeping the durability and the simplicity**. The ALLOVER uses a pressurized tank and the nebulization is done using a compressed air system. These characteristics allied with adjustable nozzles and fixating arms allows for an even spread of the glue mixture for maximum performance with minimal waste.

The ALLOVER is pedal actioned to allow a more precise work. The 15 liter tank allows you to spray 2000 t-shirts in a row. This tank is safe and easy to refill having a special system for depressurization. Requiring only regular cleaning as maintenance, the ALLOVER preforms exceptionally.

1. Sprays using compressed air

2. User friendly.  
Adjustable spraying

3. Adjustable nozzles and fixating arms

**ROQADHESIVE ALLOVER**

[A] length - mm (pol)	1400 (55.1")
[B] height - mm (pol)	1445 (56.9")
[C] maximum width - mm (pol)	600 (23.6")
distance between fixating arms - mm (pol)	300 a 555 (11.8 a 21.9")
weight - kg (lb)	42 (93)
electric consumption - (kVA)	0,06
compressed air consumption - l/min (cfm)	120

- power supply: 220V, 50Hz or 60Hz
